FLUID EQUIPMENT OPERATOR

Full-Time, Permanent

Grassland Dairy Products, Inc. has been a leading manufacturer of butter and dairy ingredients since 1904 and is looking to add a Fluid Plant Equipment Operator to our team in Greenwood, WI. With additional facilities across Wisconsin, Nebraska and Utah, Grassland is a key player in the dairy industry dedicated to producing high quality products while maintaining a positive work environment for a driven, talent-filled team of employees.

A Fluid Plant Equipment Operator is responsible for the efficient operation of pasteurizer, filtration, and evaporator systems throughout the fluid plant. This individual is expected to conduct themselves in a manner that promotes the continuous improvement of Grassland Dairy Products mission for Quality, Safety, and Efficient production.

Essential Duties and Responsibilities:

- Follow and comply with applicable good manufacturing, safety, and quality assurance practices.
- Verify quality control items such as product composition, temperature, physical and chemical properties.
- Perform cleaning and sanitation of equipment.
- Follow proper documentation procedures in all recordkeeping formats.
- Operate pasteurizer systems, ultra filtration, reverse osmosis, micro-filtration, and evaporator systems at an efficient level to fulfill plant goals and objectives.
- Complete necessary preventative maintenance on equipment and processes.
- Contribute to general cleaning and good housekeeping practices throughout the facility.
- Follow applicable work instructions, standard operating procedures and complete necessary training elements and competencies.
- Backfill throughout department as needed.

Knowledge, Skills, and Abilities:

- Exceptional attention to detail and strong organizational skills.
- Demonstrate a willingness and ability to understand products manufactured and the processes involved.
- Ability to adapt effectively within a continually changing and demanding work environment.
- Exhibit knowledge of system flows & operations with troubleshooting abilities.
- Demonstrate the readiness and ability to communicate effectively in order to maintain high levels of safety, quality, and efficiency.
- Capable of prioritizing and effectively operating multiple processes simultaneously.
- Establish an understanding of product flows and the relationship between upstream and downstream equipment and/or process's.
- Validate the comprehension and willingness to follow standard operating procedures and company guidelines.
- Ability to work with sanitation chemicals common to the food manufacturing industry.
- Must be able to work in tight or confined spaces.
- Demonstrate the Qualified Individuals responsibilities for the Preventative Control – Cleaning and Sanitation Program.

Education and Experience:

- Minimum of high school diploma or equivalent.
- 1+ year(s) of manufacturing and industrial machine operations experience preferred.
- Maintain HACCP certification
- Maintain a Pasteurizers License.

Above the Rest Benefits:

- Competitive compensation and weekly pay period.
- Zero premium, company-paid health, dental and life insurance.
- Short-term disability.
- Profit sharing plan with 401(k) enhancement, matched.
- On-site health care and wellness initiatives.
